

The Advantages of a Wall Bracket

Wall Cabinet

vs

Wall Bracket

LIMITED VISIBILITY
Limited to 1 small window for monitoring Fill Level
RARELY CLEANED
High Touch Surface - not cleaned and remains on the wall. Never undergoes a high temp disinfection
PATIENT INTERRUPTIONS
Service technicians must enter to clearly see the view window for waste level determination.
SIZED FOR 1 CONTAINER
The wall cabinet is sized for the container it holds. If you transition to a larger container, you will need to replace the cabinet.

FULL VISIBILITY
Full Visibility for Monitoring the Fill Level from ALL sides due to the semi-transparency of the container.
FREQUENTLY CLEANED
High Touch Surface - Each time the container is removed, it is replaced with a decontaminated and clean container.
NO PATIENT INTERRUPTIONS
Service technicians can check containers's fill levels outside of the room due to semi-transparent container. The container is the cabinet.
FITS ALL CONTAINER SIZES
The wall bracket easily fits a 3.2 gallon and a 4.9 gallon sharps container
